Fire Protection Systems for Vehicles and Mobile Plant

Ardent are specialists in the design, supply, installation and support of pre-engineered fire protection systems. Ardent offer the expertise required combined with a unique range of systems to remove the risk of fire effectively. We work to protect people, property and capital assets from the devastation of fire.

Ardent Fire Protection distributes Ansul systems and our speciality is vehicle fire suppression systems. We offer a large range of Ansul products and now we also offer the LVS-5 agent tank. When paired with an A-101 system, the twin agent combination offer rapid knockdown with dry chemical and effective cooling with wet chemical solution. This reduces the chance of reignition.

Twin Agent Combination LVS-5 - Double Protection

- A system that has a reduced chance of reignition
- New protection opportunities
- Ideal for small and mid-sized excavators, haul trucks and wheeled loaders
- Low temperature operation - down to minus 40 degrees
- Can be mounted in both vertical and horizontal plane
- FM approved and CE marked ensuring it has been tested to the highest standard and passed
